

Installation of Landfill Gas to Energy Facility in Richmond, Virginia

ABOUT US

Frank's Industrial Services, Inc. is an industrial electrical engineering and construction firm based in Harbor City, California. Established in 1980, we perform work in a variety of industrial facilities including landfills, chemical plants, cryogenic facilities, water treatment plants, etc. We design, fabricate and program our own control panels and are UL508A certified.

Our staff of engineers, project managers and certified electricians provide our customers with reliable and professional services both on-site and off-site.
